RESTORING SOIL FERTILITY

HumeGro

Fertilizer Group III

Reg.no:M80

Act 36 of 1947

A liquid carbon extraction that contains Humic and Fulvic acids that improve soil structure and enhances the binding of nutrients in soils.

APPLICATION

- Humegro can be applied on its own as a soil conditioner or with recommended fertilizers to improve the uptake of nutrients.
- Can be applied through spraying or irrigation systems.
- 50 - 100L / ha depending on soil quality.

COMPATIBILITY

Do not mix with nitrate based fertilizers, MAP or pesticides.

CONTENT

Humic Acid : 101 g/L

Fulvic Acid : 43 g/L

Carbon : 2,1 %

K : 21 g/L

pH : 10,2

SG : 1,047 @ 20°C

KNOWN ATTRIBUTES FOR HUMATES*:

- Excellent source of carbon for soils and plants.
- Outstanding chelating agent for cations in soil.
- Improves soil structure.
- Eliminates compaction layers.
- Improves the buffer capacity of soil.
- Contributes to improved moisture retention.
- Enhances the bioavailability of plant nutrients.
- Improves the environment for soil organisms.
- Reduces the leaching of nutrients.

*Obtained from published scientific research papers and other public sources.
